PROFESSIONAL SUMMARY :

- B.E. Computer Science student (2023–2027) with strong foundations in **Data Structures & Algorithms, Object-Oriented Programming (OOP), and Software Development Life Cycle (SDLC)**, focused on building scalable and reliable software systems.
 - **Skilled in Java, Python, C++, and JavaScript**, with hands-on experience in **backend and full-stack development** using **Spring Boot, Node.js, and React.js**.
 - Experienced in **designing and developing RESTful APIs and authentication systems** using **Spring Boot, Express.js, and JWT**, following **clean architecture and MVC design principles**.
 - Proficient in **relational and NoSQL databases (MySQL, MongoDB)** with experience in **debugging, testing, and optimizing backend performance**.
 - Familiar with **cloud fundamentals (AWS EC2, S3), Linux and Windows environments, Git-based workflows, and Agile development**, enabling effective collaboration and software delivery.
-

TECHNICAL SKILLS :

- **Programming Languages:** Java, JavaScript, Python, C++, C
 - **Backend Development:** Java (Spring Boot), Node.js, Express.js, RESTful APIs, JWT Authentication, Middleware, MVC Architecture
 - **Frontend Development:** React.js, HTML5, CSS3, Bootstrap, EJS, Handlebars (HBS)
 - **Databases:** MongoDB, MySQL (Relational & NoSQL Databases), Database Design
 - **Cloud & Dev Tools:** AWS EC2, AWS S3, Git, GitHub, Linux, Windows, Postman, VS Code
 - **Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC), Agile Methodology, System Design Basics, Debugging & Testing, Networking Fundamentals (TCP/IP)
-

INTERNSHIPS :

- AI/ML Intern – Edunet Foundation (IBM SkillsBuild & AICTE)
Duration: June 2024 – July 2024
 - Completed a **6-week internship focused on Artificial Intelligence and Machine Learning fundamentals and applications**.
 - Worked on hands-on exercises involving Python, data analysis, and machine learning fundamentals.
 - Gained exposure to **AI tools, model development basics, and real-world problem solving in collaborative environments**.
-

PROJECTS :

- **Student Result Management System** – Java, Spring Boot, MySQL
 - Built **RESTful APIs** using Spring Boot following **MVC architecture** for efficient backend processing.
 - Implemented **JWT-based authentication and role-based authorization** to ensure secure access control.
 - Designed and managed **MySQL database schema** for structured data storage and optimized query performance.
 - Performed **testing, debugging, and API validation** to improve system reliability and performance.

- **COVID-19 Testing Management System** – Python, SQLite
 - Developed a **backend system** to manage patient records, test details, and result tracking.
 - Implemented **data validation, error handling, and debugging mechanisms** to maintain data accuracy.
 - Designed database structure using **SQLite** for efficient storage and retrieval of medical records.
 - **Emergency Patient Queue System** – Java, Swing, MySQL
 - Designed and implemented a **priority-based queue management system** for handling emergency patients.
 - Integrated **Java Swing GUI with MySQL database** for efficient data management and user interaction.
 - Optimized **database connectivity and query execution** to improve system performance and response time
-

EDUCATION :

- Bachelor of Engineering (B.E in Computer Science and Engineering), Chitkara University, Punjab - CGPA : **9.02**
 - **Expected Graduation:** June 2027
 - **Class X (CBSE Board)** – 82.6% with **Maths : 95% each**
 - **Class XII (CBSE Board)** – 81.4% with **Maths : 95% each**
-

CERTIFICATIONS & ACHIEVEMENTS :

- **Google Gemini Certified Student** – Google for Education
- **Oracle Cloud Infrastructure – AI Foundations Associate**
- **Microsoft Certified: Azure Fundamentals**
- **Cisco Certified: Networking Essentials & Packet Tracer**
- **Flipkart Runway Season 5** – Top 100 out of **47,000+** participants
- **Google Arcade Facilitator Program – Legend Tier**
- **Solved 355+ DSA problems on LeetCode**
